

Concrete Structures & Buildings Technical Group

Concrete Structures & Buildings Technical Group.

Mission Statement V.01 - 2021

Mission Statement.

- To share information with fellow corrosion engineers on factors affecting the durability of reinforced concrete.
- The share information regarding developments in corrosion engineering as it relates to reinforced concrete structures and buildings.
- To share and disseminate latest practice in terms of corrosion environments.
- To share and disseminate information relating to concrete mix design for strength and durability with a focus on additives and SCM's.
- We aim for a wide audience including Engineers, Asset Owners and Asset Operators.
- We build awareness of the importance of durability as a key component in the design of all structures and buildings involving reinforced concrete.
- Promote sustainable solutions for concrete structures whilst ensuring durability outcomes are achieved.

Implementation.

- Raise awareness of durability as a key issue.
- Support training for engineers preparing technical specifications for reinforced concrete construction.
- Support training for engineers involved in the production of concrete and procurement of reinforcement.
- Support training for engineers involved in policing concrete construction on site.
- Become active in the development and implementation of new standards that are relevant to our mission.

Route Map.

- We will achieve our mission by careful planning of Day Forums on an annual basis and forums within the Conference.
- We will work with the Executive to promote membership of the ACA.
- We hold video meetings on a regular basis to discuss concerns, ideas and proposals.
- We work within a collegiate environment.
- We encourage interested members of ACA to join us, but we limit the committee to 12.
